Professional Summary

Results-driven Frontend Developer with **2+ years of hands-on experience** building scalable, high-performance **web and mobile applications**. Strong expertise in **React.js, Next.js (13–15), and React Native**, with deep knowledge of modern frontend architecture, state management, and API-driven systems.

Proven track record of delivering **production-grade B2B, SaaS, and e-commerce platforms**, including mobile apps, admin dashboards, CRM systems, and third-party SDKs. Highly skilled in **Redux Toolkit, RTK Query, TanStack Query**, and modern UI systems such as **Tailwind CSS, Material UI, and React Native Paper**. Adept at collaborating with backend teams to translate complex business requirements into clean, maintainable, and scalable frontend solutions.

Technical Skills

Frontend & Mobile
React.js, Next.js (13 / 15), React Native, JavaScript (ES6+), HTML5, CSS3

State Management & Data Layer
Redux Toolkit, RTK Query, TanStack Query, Axios, REST APIs

UI / Styling
Tailwind CSS, Material UI (MUI), React Native Paper, Responsive Design

Architecture & Performance
Reusable Component Architecture, Code Splitting, Lazy Loading, Modular Design

SEO & Web Optimization
SEO-Friendly Routing, Sitemap.xml, Robots.txt, JSON-LD, Middleware

Tools & Platforms
Git, GitHub, Rollup, VS Code, Postman, Chrome DevTools

Professional Experience

WEBLORE TECHNOLOGIES PRIVATE LIMITED | Karnataka

Frontend Developer
May 2025 – Present

Tech Stack: Next.js 13/15, React Native, Redux Toolkit, RTK Query, Rollup, Material UI, React Native Paper, REST APIs

Experience Summary

Frontend Devleloper contributing to scalable **B2B and SaaS platforms** across mobile and web. Actively involved in building production-ready applications, internal admin tools, CRM systems, and third-party SDKs with a strong focus on performance, maintainability, and user experience.

Project 1: OOGE — B2B Mobile Marketplace

Role: React Native Developer
Platform: Android & iOS

- Developed core mobile flows including authentication, product discovery, order placement, and order management.
- Implemented scalable API architecture using **RTK Query**.
- Managed global application state using **Redux Toolkit**.
- Built consistent and accessible UI components with **React Native Paper**.
- Optimized mobile UX for smooth performance and real-world business usage.

🔗 iOS: https://apps.apple.com/in/app/ooge-management-system/id6751741393

Project 2: Admin Platform (SaaS) — Intellora.ai

Role: Frontend Developer
Tech Stack: Next.js 13, Material UI, Redux Toolkit

- Developed responsive admin dashboards for internal operations.
- Built modules including dashboard, ticket management, real-time chat, and internal tools.
- Ensured consistent UI/UX across devices using Material UI.
- Implemented reusable component architecture for long-term scalability.

Project 3: Itinerary Builder System (SaaS) — TripTools.ai (Subsidiary of Intellora.ai)

Role: Frontend Developer

- Designed and implemented a multi-step itinerary creation workflow.
- Built reusable dynamic form components.
- Integrated backend-driven templates using REST APIs.
- Collaborated closely with Java + Spring Boot backend teams to design and integrate **dynamic itinerary templates**, enabling backend-driven content rendering and real-time PDF itinerary generation.
- Played a key role in converting itinerary data into structured, customer-ready PDF outputs.

Project 4: CRM System for Lead Management — Intellora.ai

Role: Frontend Engineer

- Built Kanban board for visual lead tracking.
- Developed list-based data management views.
- Implemented complete lead lifecycle workflows.
- Improved business visibility through intuitive UI/UX.

Project 5: Travel Widget SDK (Third-Party Integration) — TripTools.ai (Subsidiary of Intellora.ai)

Role: Frontend Engineer (SDK Owner)
Tech Stack: Next.js 15, Rollup, JavaScript

- Designed and developed a plug-and-play **Travel Widget SDK** under TripTools.ai.
- Built modular SDK architecture for external partner websites.
- Configured Rollup for optimized bundle generation and distribution.
- Enabled seamless third-party integration for travel and itinerary features.

ADHARVA SOFT LABS PVT. LTD. | Karnataka

Frontend Developer
Jan 2024 – May 2025

Tech Stack: React.js, Next.js, React Native, Tailwind CSS, Axios, TanStack Query, Yup, REST APIs, Middleware, SEO

Experience Summary

Worked on e-commerce and B2B platforms delivering high-performance, responsive, and SEO-optimized applications. Took strong ownership across frontend development, migration, optimization, and mobile app delivery.

Project 1: EpicEnterprise — Commercial Kitchen Equipment E-commerce

- Designed and developed complete e-commerce application from scratch.
- Built responsive UI using Tailwind CSS.
- Integrated REST APIs using Axios and TanStack Query.
- Implemented authentication, registration, and secure form handling.
- Developed Yup-based form validation.
- Implemented full CRUD operations for products and users.
- Created scalable, reusable React component architecture.

Project 2: CutisKart Migration from React.js to Next.js

🔗 https://www.cutiskart.com/

- Migrated large-scale React application to Next.js.
- Improved routing, performance, and SEO.
- Implemented mobile OTP authentication using Next.js middleware.
- Added SEO enhancements:
- Dynamic routes
- sitemap.xml
- robots.txt
- JSON-LD structured data
- Fixed critical bugs and performance issues.

Project 3: OOGE — B2B Mobile Accessories Marketplace

🔗android https://play.google.com/store/apps/details?id=com.oogiapp&pcampaignid=web_share

🔗ios https://apps.apple.com/in/app/ooge-management-system/id6751741393

- Developed mobile commerce flows including PLP, PDP, cart, and order confirmation.
- Integrated APIs using TanStack Query.
- Implemented role-based product visibility.
- Focused on smooth and intuitive mobile UX.

Personal Projects

- **Nike UI Clone** – Responsive e-commerce UI inspired by Nike website.
  🔗https://nike-clone-iota-eight.vercel.app/

- **Infinite Scrolling Demo** – Implemented optimized infinite scroll using API pagination.
  🔗https://next-infiine-scrooling.vercel.app/

- **YouTube Clone** – Video listing, responsive layout, and component-based architecture.
